

BlueTC Wins Challenging Project with UK Operator

Blue Telecom Consulting (BlueTC®) is pleased to announce a new project with an operator that is a leader in voice, data and mobile products and services in the UK market.

The operator chose to work with BlueTC due to our strong telecoms expertise and ability to meet their very exacting needs. This involved fulfilling demanding project delivery milestones in a flexible manner within a challenging scope. Our consultants are delivering testing services, to ensure the core mobile network is fully prepared for their converged offering.

Miguel Angel García Matatoros, CEO of BlueTC, highlights "that due the increasing complexity of mobile networks, there is a growing need for operators to build efficiencies into their testing activities, which includes the need for agile testing via an automated orchestration tool. Once fully automated, our customers often benefit from time savings in the order of 80% or more".

BlueTC is headquartered in Madrid, has a subsidiary in Sweden and opened an office in the UK in 2015.
